Parallel Session B

NORFACE Special Session B: TCRAf-Eu and LineUp

9:00 - 11:00 am Chadwick G08

Transnational families: effects on children and caregivers in countries of origin and migrant parents in destination countries

This session presents research conducted in the TCRAf-Eu project linking children, caregivers and migrant parents in transnational families between Africa and Europe. The project uses an integrated, mixed method and multi-sited approach to bring together the effects that transnational living has on the different actors involved. Presentations focus on each of the three actors and show how conditions in a migrant receiving country impact the effects felt by actors in a migrant sending country.

NORFACE Special Session F: THEMIS and CHOICES

11:30 - 1:30 pm Chadwick G08

"Explaining the growth and decline of migration: the role of feedback mechanisms – A roundtable with evidence from the THEMIS project"

How do the migration processes of yesterday influence those of today? What are the mechanisms by which the knowledge and practices of one set of migrants help to shape those who come after them? These are key questions for the THEMIS (Theorizing the Evolution of European Migration Systems) project, which has been exploring how enduring patterns of migration emerge, are sustained and decline. Drawing on evidence from movements between Ukraine, Brazil and Morocco to the Netherlands, Norway, Portugal and the UK, this roundtable discussion will examine how migrants' experiences of economic conditions, state policies, and new connections created by social media generate feedback that shapes subsequent migration.

The roundtable will start with short interventions by THEMIS research team members followed by an open discussion.
